

Strategic Solutions Overview

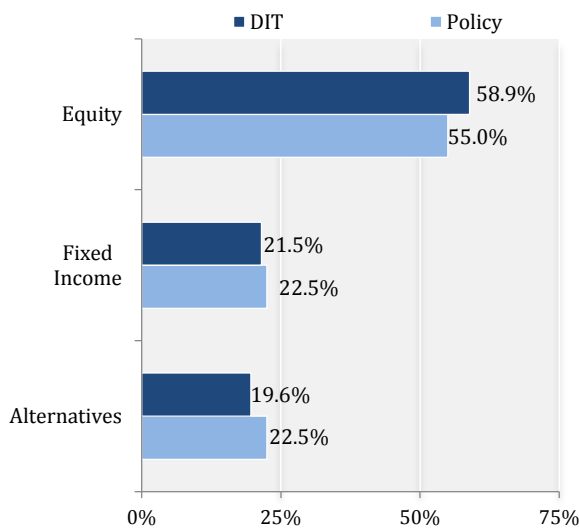

Since 2009, The Diocesan Investment Trust of New York ("DIT") has been managed by the Commonfund Strategic Solutions Group. This comprehensive investment management program provides investment management advisory, and middle office services to clients. It is a collaborative approach, encompassing all aspects of portfolio management, including investment policy review, portfolio construction, total portfolio monitoring, rebalancing, risk management and reporting.

Commonfund Strategic Solutions® brings together the accumulated best thinking and investment management practices of Commonfund. The Strategic Solutions program is designed exclusively for nonprofit institutions that seek to improve all aspects of the management of their portfolios – providing guidance where needed in policy formulation, while focusing support on the resource-intensive implementation and execution of investment policies. Our dedicated professionals work with each client to design, tailor and implement an investment program that meets their specific needs. In doing so, Strategic Solutions helps to strengthen the fiduciary role of a client's Trustees by providing Investment Committee members the time to focus on strategic policy issues. The program is designed to serve as an extension of a client's investment staff and Investment Committee (not a replacement of), and as a resource to the institution's Trustees.

The main objective of DIT is to achieve growth in principal value (spending) over time sufficient to preserve or increase purchasing power, thus protecting against inflation. DIT invests in a diversified portfolio of strategies inclusive of traditional and non-traditional (alternative) investments through a diversified manager approach.

As of June 30, 2017 Strategic Solutions managed roughly \$8.4 billion for 65 non-profit clients.

Asset Allocation Detail | As of June 30, 2017

Cumulative Performance (Growth of \$100) | 4/30/09 - 06/30/2017

Past performance is not indicative of future results. Unless otherwise indicated returns are net of all fees and expenses and reflect reinvestment of earnings.

Diocesan Investment Trust of New York
Portfolio Overview
 As of June 30, 2017

YTD Performance Drivers as of June 2017

Positives

- + Global Equity Fund (+20.8%): outperformed the MSCI ACWI by 2.0% for the year led by strong active manager returns in Japan (+8.9% vs. MSCI Japan), the U.S. (+1.6% vs. S&P 500) and emerging markets (+1.5% vs. MSCI EMF). Global orientation was beneficial as non-U.S. stocks outperformed U.S. stocks.
- + High Quality Bond Fund (+0.3%): outpaced the benchmark by 1.3% for the year led by underweight allocations to duration and Treasuries and an overweight to commercial mortgage-backed securities and corporate bonds. Security selection within the dedicated mortgage allocation (Rimrock) was also additive.

Negatives*

- GAAC returned -0.56% for the quarter, trailing the T-Bills+400bps benchmark by 1.8%. Due to the underlying manager's diversified positioning no single explanation can account for the fund's disappointing results. The two negative outliers were a global macro manager and equity market neutral Asian manager

*Quarter-to-date bullet

Commonfund Portfolio Positioning

- **Equities (Overweight):** neutral regional weights
- **Fixed Income (Neutral):** underweight duration and Treasuries; underweight high yield and distressed and overweight mortgages
- **Alternatives (Neutral / Slight Underweight):** underweight real assets and neutral hedge fund strategies

Performance Summary

Fiscal Years (December 31)	DIT Endowment	Policy Benchmark	CPI+Spend*	70/30 ACWI/Agg	Annualized Performance	DIT Endowment	Policy Benchmark	CPI+Spend*	70/30 ACWI/Agg

2010	12.16%	12.19%	5.50%	11.31%					

Risk & Return Summary | 4/30/2009 - 06/30/2017

Definitions

Standard Deviation

Statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution; the larger the standard deviation, the greater the degree of dispersion around the average value.

Sharpe Ratio

Risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better a fund's historical risk-adjusted performance. Determined according to the following formula: excess return over 91 day T-Bill divided by portfolio's standard deviation. This is an absolute return risk measure. Higher Sharpe ratios are more attractive than lower Sharpe ratios

Spending Policy

*Spend = 1.0% distribution each quarter, which equals approximately 4.06% annually
