

**Overview**

Since 2009, The Diocesan Investment Trust of New York ("DIT") has been managed by the Commonfund OCIO Group. This comprehensive investment management program provides investment management advisory, and middle office services to clients. It is a collaborative approach, encompassing all aspects of portfolio management, including investment policy review, portfolio construction, total portfolio monitoring, rebalancing, risk management and reporting.

Commonfund OCIO brings together the accumulated best thinking and investment management practices of Commonfund. The OCIO program is designed exclusively for nonprofit institutions that seek to improve all aspects of the management of their portfolios – providing guidance where needed in policy formulation, while focusing support on the resource-intensive implementation and execution of investment policies. Our dedicated professionals work with each client to design, tailor and implement an investment program that meets their specific needs. In doing so, the OCIO Group helps to strengthen the fiduciary role of a client's Trustees by providing Investment Committee members the time to focus on strategic policy issues. The program is designed to serve as an extension of a client's investment staff and Investment Committee (not a replacement of), and as a resource to the institution's Trustees.

The main objective of DIT is to achieve growth in principal value (spending) over time sufficient to preserve or increase purchasing power, thus protecting against inflation. DIT invests in a diversified portfolio of strategies inclusive of traditional and non-traditional (alternative) investments through a diversified manager approach.

Similar to DIT, Commonfund is a signatory to the Principles for Responsible Investment (PRI). As such, Commonfund affirms its corporate commitment to the importance of environmental, social and governance investment issues. Oversight is maintained by Commonfund's Board of Trustees and CEO to monitor investment strategy and implementation to ensure compliance with Commonfund's ESG Policy and adherence to the PRI's six Principles. Please see [www.commonfund.org](http://www.commonfund.org) and <https://www.unpri.org>.

As of December 31, 2019 Commonfund OCIO managed approximately \$9 billion for 59 nonprofit clients.

**Asset Allocation Detail | As of December 31, 2019**

**Cumulative Performance (Growth of \$100) | 4/30/09 - 12/31/2019**

Past performance is not indicative of future results. Unless otherwise indicated returns are net of all fees and expenses and reflect reinvestment of earnings.

**QTD Performance Drivers as of December 2019**

The DIT portfolio (+5.8%) performed in line with the policy benchmark (+5.8%) for the quarter through December.

**Positives**

+ **Private credit** (+2.4%) outperformed the Bloomberg Barclays U.S. Aggregate Bond Index by 2.2%. The Commonfund Private Credit Fund 2018 (+2.8%) saw strong performance, particularly from the Cerberus Global NPL strategy that has seen several early deals recover to better outcomes than originally underwritten.

**Negatives**

- **Strategic Solutions Global Equity** (+8.7%) underperformed the MSCI ACWI by 24 basis points. Martingale's low volatility strategy detracted most from returns in the U.S. due to the risk-on market environment that hurt low volatility stocks. Symphony (+11.9%) aided developed international returns, with strong performance from a construction related company that benefitted from increased activity surrounding the upcoming 2020 Summer Olympics in Tokyo.

- **Global Absolute Alpha Company** (+1.6%) trailed the HFRI FOF Conservative Index by 27 basis points, as it struggled to keep pace during a strong quarter for equity markets given its strategic low beta construction. However, for the calendar year, the fund returned 7.2% and generated alpha in excess of the benchmark even against a backdrop of global equity markets returning 26.6%.

**Commonfund Portfolio Positioning and Point-of-View\***

- **Equities (Neutral):** neutral to regional weights relative to MSCI ACWI, neutral to target
- **Fixed Income (underweight):** slight underweight to duration and Treasuries; overweight corporates and mortgages; underweight core bonds by one percent
- **Alternatives (overweight):** neutral to real assets and overweight hedge fund strategies by one percent

\*Commonfund rebalances the portfolio to the point-of-view at quarter-end. Positioning may differ from point-of-view due to intra-quarter market movement.

**Risk & Return Summary | 4/30/2009 - 12/31/2019**

**Definitions**
**Standard Deviation**

Statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution; the larger the standard deviation, the greater the degree of dispersion around the average value.

**Sharpe Ratio**

Risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better a fund's historical risk-adjusted performance. Determined according to the following formula: excess return over 91 day T-Bill divided by portfolio's standard deviation. This is an absolute return risk measure. Higher Sharpe ratios are more attractive than lower Sharpe ratios

**Spending Policy**

\*Spend = 1.0% distribution each quarter, which equals approximately 4.06% annually
